UDGAM • NIT SIKKIM

ANIME EVENT RULEBOOK

Cultural Fest • Game Rules

This rulebook outlines the format, scoring system, time limits, and gameplay procedures for the anime events conducted during UDGAM, the cultural fest at NIT Sikkim.

1. Guess the Anime Character

Description

Participants must identify anime characters shown through images, silhouettes, or cropped pictures within a limited time. The game tests anime knowledge, observation skills, and speed.

Rules and Time Limits

1. The game will consist of 3 rounds, with 5 questions in each round (15 questions in total).
2. Each question will display an anime character's image or silhouette on the screen.
3. Participants will have 10 seconds to identify the character and name the anime. The timer will start when the image is clearly displayed and the host announces the start.
4. Each correct character identification earns 1 point, and correctly naming the anime earns 1 additional point. Each question is worth a maximum of 2 points.
5. Answers must be submitted using the method announced by the host before the timer ends. Late answers will not be accepted.
6. Commonly recognized aliases, official alternate titles, and minor spelling errors may be accepted if the intended answer is clear.
7. No hints, mobile phones, internet searches, or assistance from other participants are allowed.
8. The participant with the highest total score after all rounds will be declared the winner.

Tiebreaker

If two or more participants finish with the same score, additional character-identification questions will be asked, with 5 seconds per question. A participant wins when they answer correctly and the other tied participants fail to answer correctly. If the result is still tied, another question will be asked. If the order of simultaneous answers cannot be determined, the question will be repeated with a new one.

Technical Issues and Disputes

If a technical issue affects a question, the host may pause or repeat it. Any answer or scoring dispute must be raised with the event coordinator before the final result is declared. The coordinator's decision based on the answer key and these rules will be final.

2. Anime Quiz Battle

Description

Participants compete individually or in teams to answer anime-related questions about characters, storylines, iconic dialogues, soundtracks, abilities, and anime trivia. The game tests knowledge, teamwork, and quick thinking.

Rules and Time Limits

9. The competition will consist of 3 rounds: Easy, Intermediate, and Advanced.
10. Each round will contain 5 questions, making a total of 15 questions.
11. Participants will have 15 seconds to answer each question in the Easy and Intermediate rounds, and 20 seconds in the Advanced round. The timer will start once the complete question has been presented and the host announces the start.
12. Each correct answer earns 10 points. Incorrect or unanswered questions earn 0 points.
13. Answers must be submitted within the allotted time using the method announced by the host. Once submitted, an answer cannot be changed.
14. No mobile phones, internet searches, or external assistance are allowed.
15. For team participation, only the designated team representative may submit the final answer. Teams may discuss the question within the allotted time.
16. The organizers will use a predefined answer key. Alternative answers will be accepted if they are demonstrably correct and relevant.
17. Scores from all three rounds will be added to determine the final standings. The participant or team with the highest total score will be declared the winner.

Tiebreaker

If two or more participants or teams finish with the same total score, a sudden-death round will be held. Each tied participant or team will receive the same question and have 10 seconds to answer. If only one answers correctly, they will be declared the winner. If all or none answer correctly, another question will be asked until the tie is broken. If answers are simultaneous and no unique winner can be determined, another question will be used.

Technical Issues and Disputes

If a question is ambiguous, incorrect, or affected by a technical issue, the organizers may clarify, replace, or cancel it and apply the same scoring adjustment to all affected participants or teams. Scoring disputes must be raised before the final result is declared. The event coordinator’s decision based on the answer key and these rules will be final.

General Gameplay Rules

18. Participants must not signal, prompt, or communicate answers to other participants during a question.
19. Rule violations, including unauthorized assistance or deliberate disruption, may result in a warning, cancellation of points for the affected question, or disqualification, depending on severity.
20. The host’s timer and announced time limit will be followed for every question. If the timer or display fails, the host may pause and restart the affected question to ensure fair play.
